

WORKRIGHT SAFETY SOLUTIONS

Safety problems? We create solutions.

LiftRight lifting devices

Workplace safety is essential for the success of a business, regardless of its size. Business owners and managers are responsible for the health and safety of their workforce and State and Federal Workplace safety requirements have placed a priority on safe work practices in industry and business. The penalties for not complying with occupational health and safety legislation can include heavy fines and prosecution.

One in three injuries to Australian workers is caused by manual handling, with inexperienced workers at greatest risk. Manual handling injuries can be caused by lifting or carrying heavy loads, or by handling items in a variety of other ways including pushing, pulling, holding or restraining.

While good posture and lifting techniques definitely help reduce the risks, research shows that implementing proper and suitable lifting equipment is the most effective way to prevent manual handling injury.

Research by WorkSafe Victoria (www.worksafe.vic.gov.au) indicates that the most common injuries related to manual lifting, as shown by injury claims, are:

- Back (48%) – muscle strain and disc injury from lifting objects such as boxes, cartons, crates, bags, drums, powered tools, equipment and other materials
- Shoulder (17%) – traumatic joint/muscle injury and strain from lifting objects and repetitively handling objects or other materials
- Abdomen (16%) – hernias from heavy and/or awkward lifting.

WORKRIGHT SAFETY SOLUTIONS

LiftRight Multi-Purpose Lifter

The LiftRight Multi-Purpose Lifter provides an excellent solution for the safe and easy lifting and moving of heavy items.

This innovative multi-purpose lifting device has been designed to be used in a wide variety of workplace situations to easily lift items up to 100kg, greatly reducing the risk of personal injury or damage to floor surfaces. It can also minimize productivity losses as it:

- eliminates unsafe lifting practices and worker safety concerns
- reduces productivity losses due to worker accident and injury.

The lifter can be used in a wide range of applications, from lifting and moving pot plants in a nursery, to providing a mobile, height adjustable work bench for tradesmen such as ceramic tilers. It has also been configured to:

- lift gas bottles on and off forklifts
- lift and position building panels
- lift moulds for storage or mould changing
- lift rolls of fabric, paper or plastic film
- lift items into and out of cartons/boxes.

Features

- strong/sturdy all steel construction
- zinc coated for rust resistance
- small, lightweight and easily manoeuvrable
- easy to operate and user friendly
- can be custom made to suit specific circumstances.

Organisations that will benefit from the LiftRight Multi-Purpose Lifter

- construction industry
- tradespeople including builders and tilers
- nurseries
- storage and warehousing
- hospitality.

LiftRight Wheel Lifter

The LiftRight Wheel Lifter makes it easier, faster and safer to lift and move tyres and wheels. The Wheel Lifter takes the heavy lifting out of the process of removing or fitting wheels to a vehicle. It has been specifically configured to lift wheels on and off vehicles and it can also lift a wheel onto a wheel balancer.

With the average weight of a 4 wheel-drive wheel being almost 40kg, the Wheel Lifter is an excellent solution to workplace safety for lifting wheels on and off vehicles, and onto a wheel balancer. The Wheel Lifter can be used on passenger vehicles, light commercials and 4 wheel-drives.

Features

- strong/sturdy all steel construction
- zinc coated for rust resistance
- small, lightweight and easily manoeuvrable
- fully mobile on wheels, making it easy to move around a workshop so it can be used at various locations within the premises
- powered by lightweight rechargeable batteries so it can be used in any circumstance
- able to be used in existing workshops without needing building modifications
- requires minimal staff training for it to be incorporated into existing work practices, is easy to operate and user friendly.

Organisations that will benefit from the LiftRight Wheel Lifter

- fleet operators
- auto mechanics
- auto service centres
- tyre services.

“*Having the Multi-Purpose Lifter makes our work here much easier and greatly reduces the risk of shoulder injuries.*”

Grant Dennis
Production Manager, Stickylabels, Victoria
