

LiftRight Multi-Purpose Lifter

In any situation where items have to be lifted and moved, the **LiftRight Multi-Purpose Lifter** can make the job easier, faster and safer. This multi-purpose lifting device has been designed to be used in a wide variety of workplace situations to easily lift items up to 100kg, greatly reducing the risk of personal injury or damage to floor surfaces.

The lifter can be used in a wide range of applications, from lifting and moving pot plants in a nursery, to providing a mobile, height adjustable work bench for tradesmen such as ceramic tilers. It has also been configured to:

- lift gas bottles on and off forklifts
- lift and position building panels
- lift moulds for storage or mould changing
- lift rolls of fabric, paper or plastic film
- lift items into and out of cartons/boxes.

The **LiftRight Wheel Lifter** has been specifically configured to lift wheels on and off vehicles, making it easier, faster and safer to lift and move tyres and wheels. It can also lift a wheel onto a wheel balancer. The Wheel Lifter can be used on passenger vehicles, light commercials and 4 wheel-drives.

The Wheel Lifter is:

- fully mobile on wheels, making it easy to move around a workshop so it can be used at various locations within the premises
- powered by lightweight rechargeable batteries, so it can be used in any circumstance
- able to be used in existing workshops without needing building modifications
- requires minimal staff training for it to be incorporated into existing work practices, is easy to operate and user friendly.

Workplace safety

Workplace safety is essential for the success of a business, regardless of its size. Business owners and managers are responsible for health and safety in the workplace. This responsibility is to their workers as well as all customers and visitors.

Workplace safety requirements have placed a priority on safe work practices in industry and business and State and Federal Government occupational health and safety (OHS) legislation requires businesses to provide safe workplaces and facilities and safe systems of work. The penalties for not complying with OHS legislation can include heavy fines and prosecution.

WorkRight Safety Solutions

WorkRight Safety Solutions is an Australian company established to provide specialised and creative solutions to businesses facing safety risks. Designers and engineers work together to develop a tailored solution to your industry or business risks. Invariably these solutions to safety problems also result in better efficiency and productivity. Safety shouldn't be a burden on business.

All WorkRight Safety Solutions products are patented, and Australian designed and made.

LiftRight Keg Handling Equipment

The **LiftRight Keg Trolley** is designed to move beer kegs easily and safely. It allows users to easily lift and manage 50 litre kegs – that weigh well over 60kg – greatly reducing the risk of personal injury or damage to floor surfaces. The trolley can also come with an attachable frame to easily move and store gas bottles.

The **LiftRight Keg Lifter** was developed to allow beer kegs to be stacked on top of each other easily and safely. It's simple, ergonomic design is manually operated or can be powered by a rechargeable cordless drill.

Kegs can be safely unloaded from pallets without touching the kegs, when the Keg Trolley is used in conjunction with the **LiftRight Pallet Ramp**.

Use the **Stacksafe Base Supports** to double stack kegs, allowing you to fit twice as many kegs into the cool room, to keep the beer cold and fresh and your customers happy!

Benefits and features:

- greatly reduces the risk of injury when handling kegs
- kegs can be secured and lifted from any position - the keg does not have to be manually handled
- the keg is locked onto the trolley so it cannot fall, reducing risk of damage and injury
- fully adjustable to suit all beer kegs used in Australia
- kegs can be moved easily over rough, uneven ground or up and down stairs
- releases and places kegs gently to avoid damage to floors
- kegs can be double stacked securely and safely so cold storage areas are used more efficiently
- easy to operate and user friendly.

The **LiftRight Backsaver Trolley** was developed to reduce the risk of back injury when moving packaged goods. Whether you are loading beverages into a display refrigerator, stacking cartons onto storage shelves or helping load cartons of beer into a customer's car, you no longer have to bend over to pick up the last item.

Benefits and features:

- adjustable weight capacity so the trolley can be set up to suit the items being moved
- strong, lightweight aluminium construction
- the trolley platform is automatically lowered as weight is added and automatically raised as weight is removed
- the trolley does the heavy lifting
- a removable tray can be made to suit different goods.

WorkRight Safety Solutions was proud to be awarded the Worksafe Victoria Award for the best solution to prevent musculoskeletal injuries for their revolutionary LiftRight Keg Handling System. The award recognised the safety improvements and productivity gains achieved with the keg handling system.

Watergate Safety Gate

The innovative **Watergate Safety Gate** is an excellent solution to workplace safety for industries that require the loading and unloading of goods and raw materials to and from elevated loading areas. It provides a loading environment that is safe, well structured and easily managed. Once installed the Watergate provides a permanently fixed safety barrier system that can easily be switched from the open or closed position in seconds.

Benefits and features:

- provides a fail-safe fall protection system for sites where forklifts load materials onto raised platforms or mezzanine floors
- allows enormous flexibility in safe handling of materials and is simple to install and operate
- can be tailor made to suit your requirements and the fall protection barrier can be configured to suit any application
- can be set up to suit whatever size materials are being loaded
- can easily be installed into existing buildings or incorporated into new constructions
- can be mounted directly to racking systems and fitted to scaffolding on construction sites
- greatly improves efficiency.

“ Our carpet manufacturing process takes place over two levels. This creates many problems and safety issues. We progressively installed eight Watergate Safety Gates on loading platforms requiring fall protection. Our staff find the gates very easy to use and our work practices have become easier, faster and safer. ”

Tony Matthews

Maintenance Manager, Victoria Carpets

“ You have ... developed a very user friendly solution that takes the ergonomic risks out of double stacking and also has a very good keg placement plate to ensure stability of the top keg. Your solution we consider as best practice. ”

Brent Wright

National Beer Systems Manager, Lion Nathan, Australia
